AMENDMENTS TO THE CLAIMS

The current status of all claims in the Application is as follows:

Claims 1-7 and 13-18 (CANCELED).

8. (ORIGINAL) A method for attaching a base member to an end of a fluorescent lamp glass envelope, the method comprising the steps of:

providing an annular end portion on an external wall portion of the glass envelope;

pressing a base shell member of a cup-shape configuration onto the end portion of the envelope;

applying a collar of shrink wrap material to the envelope end portion and the base shell member; and

shrinking the collar to compress against the envelope end portion and the base shell member, to fix the base shell member on the envelope end portion.

- 9. (ORIGINAL) The method in accordance with claim 8 and comprising the further step of providing an adhesive on an interior surface of the collar.
- 10. (ORIGINAL) The method in accordance with claim 9 wherein the adhesive is curable adhesive and the method includes a further step of curing the adhesive after applying the collar to the envelope end portion and the base shell member.
- 11. (ORIGINAL) The method in accordance with claim 8 wherein shrinking the collar comprises applying heat to the collar to heat shrink the collar.
- 12. (ORIGINAL) The method in accordance with claim 10 wherein the adhesive is cured by the application of heat and the collar is shrunken by the application of heat.

19. (ORIGINAL) A method for attaching a base member to an end of a fluorescent lamp glass envelope, the method comprising the steps of:

providing an annular end portion on a wall of the glass envelope;

pressing a base shell member of a cup-shape configuration onto the end portions of the envelope; and

applying a collar of wrap material to the envelope end portion and the base shell member, the wrap material having a layer of adhesive on an interior surface thereof to fix the base shell member on the envelope end portion.

- 20. (ORIGINAL) The method in accordance with claim 19 wherein the adhesive is curable adhesive and the method comprises a further step of curing the adhesive after applying the collar to the envelope end portion and the base shell member.
- 21. (ORIGINAL) The method in accordance with claim 19 wherein the collar is of a shrink wrap material and the method comprises a further step of shrinking the collar onto the envelope end portion and the base shell member.
- 22. (ORIGINAL) The method in accordance with claim 20 wherein curing the adhesive comprises heat curing the adhesive.
- 23. (ORIGINAL) The method in accordance with claim 21 wherein shrinking the collar comprises heat shrinking the collar.
